**Dear Valued Customers,**

## **Object: California Proposition 65**

“The Safe Drinking Water and Toxic Enforcement Act” adopted in the State of California as a voter initiative (Proposition 65) in November 1986, provides restrictions on exposure to and use of certain chemicals which have been determined by the State of California to cause cancer or reproductive toxicity. It requires that business operating in California, as well as businesses marketing products in California, put warnings on any product containing listed chemicals unless the seller has tests that prove the product meets Proposition 65 exposure level standards.

F.lli Tognella S.p.a. products contain one or more of the over nine hundred ( 900 ) chemicals indicated on the Proposition 65 list, such as steel and brass. F.lli Tognella S.p.a. has determined that conducting the necessary testing to certify exposure levels on all products would be costly, difficult and time consuming and for this reason decided to place this warning letter on its website to inform all its customers about the compliance with the California laws.
