

90° double-acting flow control valves

FT 252/2-01

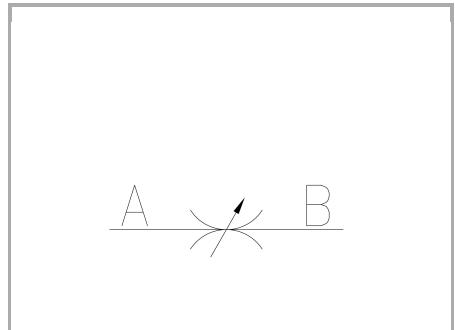

Double-acting flow control valves available from 1/4" to 1/2" bsp size, max. working pressure 350 Bar, adjustable oil flow rate from 0,5 to 60 Lt./min. (depending on the size)

Double-acting control

90° configuration In line or panel mounting

Carbon steel

Connections: F - F Female - Female

Technical information

Technical description

The valves FT 252/2-01, unlike the previous series 258/2, are manufactured by the moulding for working pressure up to 350 bar. They allow flow control in both directions. They are equipped with a needle so to obtain: • efficient metallic sealing; • flow linearity at the opening; • accurate control for a wide range of flow rate. A double reference system made up of a decimal scale on the handwheel and of a keyed metal ring with graduated fractional scale and divided into sectors, allows easily to identify the flow conditions. A locking screw in the handwheel ensures stable flow values preventing accidental adjustments or movements due to vibrations and unwanted impacts. A ring nut (G) is used to carry out the panel mounting, on request.

Materials

CORPO VALVOLA / VALVE BODY	Acciaio/Steel 11 S Mn Pb 37-UNI EN 10087
SPIOLLO DI REGOLAZIONE / ADJUSTING NEEDLE	Acciaio legato/Alloy steel
GUARNIZIONI / GASKETS	Di serie NBR - A richiesta FPM/Standard NBR-on demand FPM
ANELLI ANTIESTRUSIONE / ANTIEXTRUSION RINGS	PTFE
MANOPOLA TIPO MA - RA / KNOB TYPE MA - RA	Alluminio / Aluminium GD AlSi12 - UNI EN AB 46100
MANOPOLA TIPO MP / KNOB TYPE MP	ABS
